
PROJECTS FOR FUNDING

January, 2012

Global Health Ministries continues the healing ministry of Jesus Christ through support of the health care programs of Lutheran Churches in the developing world. Listed below are projects that have been submitted by these Churches and approved for solicitation and funding by the GHM board of Directors. They represent the priority needs of our partners to maintain and strengthen their capacity to provide hope and healing to the poor. We are pleased to present them to you as opportunities to be instruments of God's grace and engage in global health mission with general or specific project gifts. **Remember to identify the project number and title with each contribution, and thanks for all you do to "help the hands that heal!"**

In 2012, GHM will be making 22 shipments of medical supplies and equipment to Lutheran hospitals in nine countries. GHM volunteers will gather, sort, repair, catalog, pack and ship items ranging from needles, syringes and bandages to incubators, computers, ultra sound and operating tables as donations to 24 hospitals. The cost of sending one 8 by 8 by 20 foot container is approximately \$12,000. Over 100 suitcases filled with medical supplies for mission teams will be packed as well!

These donated articles are of immeasurable assistance to Lutheran health care programs overseas, often making the difference between continuing or closing. GHM's goal for 2012 is to raise \$540,000 for the shipping program.

ELCA synods are encouraged to adopt a shipment to your companion church as part of your global mission commitment. You will find a shipping project number under most countries or you may use **99-S0000 Shipping costs** "where needed." The shipments and suitcases cannot go out without your help!
